

Geographies of Innovation Band Together to Solve Global Challenges and Drive Recovery from COVID-19

Innovation district leaders from seven countries join a first of its kind practitioner-led network

The Global Institute on Innovation Districts has launched its inaugural Global Network of Innovation Districts to support districts over the short- and long-term. Leaders of these geographies of innovation—whether newly established or mature—are engaging with their peers to share insights and tactics for mitigating the various economic and health impacts from [COVID-19](#) as they advance their position over the long-term.

More broadly, this practitioner-led network is designed to elevate the importance of innovation districts as problem-solving powerhouses. Not only are districts drivers of local and regional economic growth and innovation, they tackle our greatest global challenges, including pandemics, climate change, and inequality. More information about the network, including the list of participating districts, is available [here](#).
